

# RN-Plus

INNO RN plus, a Ribbonizer, is a tool forming multiple single fibers to ribbon fiber from 2 to 12 with simple steps. Ribbon fiber organized by RN plus can be stripped and cleaved and worked with ribbon fusion splicer.

## Specifications

|                         |                                    |
|-------------------------|------------------------------------|
| Material                | Silica based fiber with UV coating |
| Fiber Diameter          | 125 $\mu\text{m}$                  |
| Coating Diameter        | 250 $\mu\text{m}$                  |
| Number of fiber         | 2 to 12 Fibers                     |
| Ribbonizing Length(Max) | 180 mm                             |

## Standard Package

## Standard Package Information

| Part No. | Description   |
|----------|---|
| RN plus  | RN plus Ribbonizer<br>Ribbonizer Adhesive(110 ml)<br>Sponge Pad(50 EA)<br>Plastic Hard Case |

## Optional Part

| Part No. | Description                |                   |
|----------|----------------------------|-------------------|
| RNA      | Ribbonizer adhesive(110ml) | 1 EA              |
| RNS      | Sponge Pad                 | 1 SET<br>(150 EA) |
